Review: 3

Feedback : To start my review I would recommend that you make your menu functional and make your title Tanini bigger. I would recommend that you make the prototype more intuitive by using the social media symbols and title your search bar at the top. You had good contrast throughout the page to make it very readable and included relevant information. Your links were confusing, I didn't know that they were links until I hovered over them. I would stick with conventions and make them similar to other links so it is more understandable.
